# Dealing with duplicate keys can be tricky

When one table has duplicate keys,
you get values from the other multiple
times after the join

Dealing with duplicate keys can be tricky

When both tables have duplicate keys,
you get all possible combinations.

key	val_x	val_y
1	x1	y1
2	x2	y2
2	x2	y3
2	x3	y2
2	x3	y3
3	x4	y4
