Try logging into the 569A cluster

Requires 2FA (https://itconnect.uw.edu/security/uw-netids/2fa/)

In a terminal, type in

`ssh [your GS username]@nexus.gs.washington.edu`

(your GS username will be the same as your UW NetID, but without the @uw.edu)

Enter your temporary password from the Google Doc when prompted

Have DUO push or call your phone and confirm

Enter your temporary password again when prompted

Enter your new password (must be at least 12 characters and include Uppercase, lowercase, a number and a symbol - it also cannot include your name or username)

Enter your new password again to confirm

You should now be on the server in your home directory

Git
